Subject: SCoR Clinical Program Update

Chuck,

Here is the slide that I have put together providing an update on SCoR Clinical Studies. I have tried to incorporate some information that the SAB has reviewed only the SCoR 6 data but not the SCoR 11 data although internally we have reviewed the preliminary within WSA. Also typically we would like to get at least the draft report in our hands before we present the data to anyone outside WSA (preferably after the final report). These dates might appear elongated primarily because other reports on time critical projects have taken priority (e.g. JLI, K6 etc). We are right now streamlining our report writing process and in the future it might take a lot shorter time to put together these reports, therefore these dates might change but are in the ballpark. Finally I would request Tony to populate the dates for the international studies rather than me second guessing the dates.
